DEC 10 1997

U.S. Nuclear Regulatory Commission  
ATTN: Document Control Desk  
Washington, DC 20555

Dear Sir/Madam:

In our December 2, 1997, letter regarding NRC Bulletin 97-02: Puncture Testing of Shipping Packages Under 10 CFR Part 71, we identified three Certificates of Compliance for which we were still seeking information on puncture testing. These certificates were identified as 9069, 9206, and 9253. We have now obtained that information.

Accordingly, we have enclosed a complete tabular listing of the Certificates of Compliance for which the Department of Energy, except for the Naval Reactors Division, has responsibility. This listing identifies the Certificate Number, the Package Model Number, and the reference for the puncture test.

This submittal should satisfy the requirements of the Bulletin. Please contact me at 301-903-5078 if you need further information.

Sincerely,

A handwritten signature in black ink, reading "Michael E. Wangler". The signature is fluid and cursive, with the first and last names being more prominent.

Michael E. Wangler
